

FOR WHAT ARE WE GOING TO RUN?

100% of all donations collected will be affected to medical research against childhood cancer. Thanks to your donations, the 2019 Children without Cancer City race will contribute to the financing of research programs (we will soon be announcing the details of these programs).

Imagine for Margo works in partnership with Gustave Roussy, the European network ITCC, the Curie Institute and the SFCE (French scholarly society of health professionals in the field of paediatric oncology) to define the

research programs that need financing in order to accelerate the research against childhood cancer.

« Thanks to the major support of Imagine for Margo, we can accelerate the development of therapeutic innovations for children in France and in Europe » Pr Gilles Vassal, Director of the clinical research at Gustave Roussy, ITCC President, says.
